## Résumé

The objective of this study is to bring up to date the previous study (may 2020), as well as to expand its scope.

We shall see that:

- The legal Belgian operators monopoly is purely theoretical because the illegal offering is overwhelming.
- In reality, legal operators face fierce competition from illegal operators, against whom they compete at a disadvantage due to the latter not caring about player protection rules (aggressive advertising, no bans on bonuses, no deposit limits, less strict age criteria, etc.).
- It is still very easy to access non-licensed gambling sites in Belgium and does not require any particular IT competency or skill.
- From a fiscal point of view, the activities of illegal gambling authorities represent a huge loss of revenue for the state. Their revenue is not subject to federal, local or regional taxes.

The Belgian authorities must take action to achieve the objective of channeling players towards a legal offer that protects their interests

## 1. Introduction

In May 2020, Ladbrokes published a study that investigated the unlicensed and illegal online gambling market in Belgium. This study showed that a Belgian player can very easily create an account, deposit on it and begin gambling on illegal websites.

The objective of this study is to update and extend the scope of the previous study by (re)analysing 500 websites (adding 250 websites to the websites analysed in May 2020) and adding three data fields to analyse: illegal advertising, the regulator and the country of origin. The same methodology used in May 2020 was applied. The analysis was carried out during the months of September and October.

We will see that the legal Belgian operators monopoly is purely theoretical because the illegal offer is overwhelming. In reality, legal operators face fierce competition from illegal operators, against whom they compete at a disadvantage due to the latter not caring about player protection rules (aggressive advertising, no bans on bonuses, no deposit limits, less strict age criteria, etc.). It is still very easy to access non-licensed gambling sites in Belgium and does not require any particular IT competency or skill. Finally, we will see that, From a fiscal point of view, the activities of illegal gambling authorities represent a huge loss of revenue for the state. Their revenue is not subject to federal, local or regional taxes.

The Belgian authorities must take action to achieve the objective of channeling players towards a legal offer that protects their interests

## 2. Methodology

### 2.1. Collecting the data

As we highlighted in the previous report, for this type of analysis, it is important to have a large amount data to work with to allow us to analyse, in the most representative way possible, just how accessible to Belgian players gambling websites that are not licensed in Belgium and, therefore, are definitionally illegal (hereinafter: "Illegal Sites"). Additionally, some of these Illegal Sites are on the Gaming Commission list of banned countries, the "Blacklist"<sup>1</sup>. Therefore access to these sites (hereinafter called "Prohibited Sites") is prohibited and should, in theory, be impossible.

Considering one of the objectives of this report is to deepen that analysis, we decided to increase the number of websites investigated as well as add new fields to the previous body of work. To do so, we have doubled the number of Illegal Sites to a total of 500. 250 of these Illegal Sites were in the previous study and shall again be considered in the present one.

To ensure that the results of our analysis were comparable to those of the previous report, the same methodology was kept when searching for these sites. As a quick reminder, they are the following:

- A key word based search engine query, using the most commonly used search engine, Google. These key words include, but are not limited to, "casino", "sports betting", "horse betting", "casino bonus" and "sports bonus" (non-exhaustive list);
- Use of promotional material on various social networks. Using the same or similar keywords as listed above, searches were made on the networks own internal search engine ;
- Following links from one Illegal Site to another. We found many examples of sister sites where one offers casino products and links to the other which offers sports betting products. Another example would be a group of sites that are all in the same group and who then link to each other; or some sites require that you have an account on a different, related site to be able to access their site.
- By using websites with lists of all gambling sites available to Belgian gamblers. One example is the website [www.casinolists.com](http://www.casinolists.com). This site contains a list of more than 700 casino gambling sites that are available to Belgian players. Please note: nowhere on this website does it state that the sites are illegal in Belgium.

---

<sup>1</sup> [https://www.gamingcommission.be/opencms/opencms/jhksweb\\_fr/establishments/Online/blacklist/](https://www.gamingcommission.be/opencms/opencms/jhksweb_fr/establishments/Online/blacklist/)

When an Illegal Site was found but it was impossible for a Belgian player to access it (for example, if an error message was displayed or if we were directed to a "STOP" page), this Illegal Site was not included in the analysis or report. All data included in this report was collected on the Prohibited Sites, which are easily accessible (via simple methods) by a Belgian player.

The Illegal Sites that were accessible at the time of the first analysis in May 2020, but which were no longer accessible at the time of this analysis, were considered as Illegal Sites accessible without any further action being possible. These Sites are indicated with the mention "N/A" for each impossible action in the table in Appendix 1.

All player accounts have been created with a false identity in order to demonstrate the ease with which a Belgian player can access the Illegal Sites, without having to go through a real identification system.

## 2.2. Data analysis

To analyse the data that was collected, the same seven criteria used previously were kept and five more were added.

For each Illegal Site, the below table was completed.

ACTIVITY ANALYSIS SEPTEMBER 2020			
Account creation		Required age	
Deposit		Blacklisted	
Possible to play		Accepts credit card	
Illegal bonuses		Illegal advertisements	
Licence		Licence Number	
Regulatory authority		Country	

### 2.2.1. The Belgian Gaming Commission's "Blacklist"

The Belgian Gaming Commission (BGC) has maintained a publicly accessible "Blacklist" on its website since 2012. The most recent update of this list (occurred during this analysis) was the 6<sup>th</sup> of October 2020.

All of the Illegal Sites used in this report have been crosschecked with this Blacklist to determine if it is also a Prohibited Site. Sites that were found to have simply manipulated their URL to make small changes from the one on the list were also considered to be Prohibited Sites. A few examples: the Prohibited Site [www.eatsleepbet.com](http://www.eatsleepbet.com) has become [www.eat-sleep-bet.com](http://www.eat-sleep-bet.com) and still offers the same products, [www.cresus .casino](http://www.cresus.casino) has become [www.cresuscasino.com](http://www.cresuscasino.com), [www.spintropolis.com](http://www.spintropolis.com) has become [www.spintroplus.com](http://www.spintroplus.com), ... - see Appendix I).

### 2.2.2. Regulators

Every legal operator in Belgium must have a licence, granted by the Belgian Gaming Commission, in order to ensure compliance with the proper standards and compliance with Belgian laws and protection for the players (fair, fraud-free and non-incentive gambling).

The Illegal Sites do not, by definition, hold such a licence. The most recurring regulators in this report are the following:

#### 2.2.2.1. Curaçao

Curaçao was one of the first countries to issue licences allowing the provision of online gambling products in 1993.<sup>2</sup>

However, there is no real Games Commission on Curaçao. So called "Master licences" are granted directly by the Ministry of Justice. Currently, four "master licences" have been granted to private companies: Gaming Curaçao, Curaçao e-Gaming, Curaçao Interactive Licensing and Antillephone. These private companies then have the possibility of granting sub-licences.

For the sake of simplicity, it was decided to use Curacao e-Gaming as the reference for a Curacao issued sub-licences.

#### 2.2.2.2. Malta Gaming Authority

The Authority was founded in 2001. It currently offers four types of licences <sup>3</sup>:

- Type 1 – Games of chance played against the house, the outcome of which is determined by a random generator (e.g. roulette, blackjack, virtual sports games, etc...);
- Type 2 – Games of chance played against the house, the outcome of which is not generated randomly but by an external event or competition (e.g. sports betting);

---

<sup>2</sup> <https://decentrale.regelgeving.overheid.nl/cvdr/XHTMLoutput/Actueel/Nederlandse%20Antillen/1855.html>

<sup>3</sup> <https://www.mga.org.mt/regulatory/mga-licensee-register/application-process/>

- Type 3 – Games of chance not played against the house and where the operator is not exposed to risk (e.g. poker or bingo) ;
- Type 4 – Controlled skill games as defined by regulation 8 of the Gaming Authorisation Regulations.

The Authority is considered one of the "best" since the introduction of the Gaming Act 2018, which tightened regulations and increased licensing requirements. The Gaming Act was passed to address concerns between the Gaming Authority and other European regulators regarding the adequacy of their licensing standards and adherence to rules that were perceived to be lax and outdated by modern European standards.

#### 2.2.2.3. United Kingdom Gambling Commission

The British Gambling Commission is the regulator for the United Kingdom, which is one of the largest and most well established markets for online gambling. Established in 2005 following the Gambling act of 2005, it issues operating licences based on the type of activity the operator will be undertaking, personal management licences and personal functional licences<sup>4</sup>.

The types of operating licences are the following<sup>5</sup> :

- Casino
- Arcades
- Betting
- Bingo
- Software
- Hardware (machines)
- Lotteries

The UK Gaming Commission is considered to be one of the best regulators in the world, with a progressive perspective, proactive regulation and adequate player protection. Since the entry into force of the Gambling Act 2014, which introduced a 15% Point of Consumption Tax, several operators have applied for a foreign licence, often from Gibraltar or Alderney, in order to avoid this tax for international customers.

#### 2.2.2.4. Gibraltar Gambling Commissioner

Online gambling licences have been granted since 1995. Since the introduction of the Gambling Act in 2005<sup>6</sup>, these licences have been granted by the Gibraltar Licensing Authority. The Gibraltar Gambling Commissioner is responsible for monitoring operators' compliance with the rules<sup>7</sup>.

<sup>6</sup> <https://www.legislation.gov.uk/ukpga/2005/19/contents>

<sup>7</sup> <https://www.gibraltar.gov.gi/finance-gaming-and-regulations/regulatory-environment>

#### 2.2.2.5. Alderney Gambling Control Commission

The Alderney Random Games Commission (AGCC) was set up in May 2000<sup>8</sup>. It grants two types of licence for online gambling<sup>9</sup> :

- Category 1 : the organisation and preparation of gambling operations
- Category 2 : the operation of a gambling platform.

#### 2.2.3. Base country

The country in which the Illegal Site is based is included in this analysis in order to be able to give a clearer view of an obvious problem: the country in which the operators of the Illegal Sites are taxed.

Bearing in mind that taxation is one of the factors to be taken into account by an operator, this is a major point on which the different countries are fighting. The fact of being subject to a higher or lower tax is therefore taken into account by an operator when choosing where to set their business up.

It is clear that countries wishing to attract gambling operators will implement low tax regimes for these activities, which may explain, in part, why Curacao and Malta are "popular" countries for online gambling operators.

#### 2.2.4. Advertising

During the preparation of the previous report, we noticed that a huge amount of marketing material was being received continuously.

Most of these marketing communications consist of advertising e-mails or regular e-mails (e.g. registration or password reset e-mails) that also contain advertising materials. However, on top of that, we also received SMS, WhatsApp messages and phone calls.

We have also included it in this report in order to illustrate that it is common practice.

We have defined as illegal advertising the following situations: when the Illegal Sites sent communications with offers inciting their customers to deposit money and inviting them to come and play on their Site, as well as when other advertisements were found on other websites (for example: referral links). We have each time verified whether or not this advertising corresponded to the requirements of the Royal Decree of 25 October 2018 relating to the modalities of operation of games of chance and betting operated by means of information society instruments.<sup>10</sup>

<sup>10</sup> Arrêté Royal du 25 octobre 2018 relatif aux modalités d'exploitation des jeux de hasard et des paris exploités au moyen des instruments de la société de l'information, M.B. 31 octobre 2018  
[https://www.ejustice.just.fgov.be/cgi/article\\_body.pl?language=fr&caller=summary&pub\\_date=18-10-31&numac=2018014587](https://www.ejustice.just.fgov.be/cgi/article_body.pl?language=fr&caller=summary&pub_date=18-10-31&numac=2018014587)

### 2.2.5. Bonus offers

We have verified whether the Illegal Site offers bonuses in any form (on their own website, in advertisements or via other communications such as registration emails or SMS). As a reminder, bonuses are prohibited in Belgium.<sup>11</sup>

### 2.2.6. Age verification / identification process

When creating the player account, with false identity data, we checked whether there were security measures in place to prevent people under the required legal age from registering on the Site. In Belgium, players under the age of 18 are not allowed to play on casino, gaming hall and sports betting offerings. Players under the age of 21 may not participate in casino and gaming hall games, but may participate in sports betting.

When looking at the Illegal Sites that were included in the first analysis, we checked whether they had implemented any new measures to address this.

### 2.2.7. Possibility of opening a player account

We have checked whether it is possible to create a player account using made up identity data.

The two methods used in the previous report were used again.

First of all, we tried to open a player account using a common browser like Google Chrome, Safari, Firefox, ... If this was not possible, another attempt was made using a free anonymous browser (TOR) or a plug-in browser (Hola).

These methods were chosen in order to demonstrate the ease with which an average Belgian player could register on Illegal Sites, as most Belgian players have access to normal browsers (in normal mode and in private mode). TOR and Hola were chosen because they are very easy to install and use and they are also free of charge.

The methods mentioned above do not require advanced computer knowledge in order to be used to their full potential.

The Illegal Sites, listed in the first study, on which we had already opened a player account were checked to see if it was still accessible: i.e. to see if we could still connect to the account or reactivate the account if it was deactivated due to inactivity, always using the same methods.

#### 2.2.8. Possibility of depositing – Credit cards accepted

If it was possible to create an account, we then tried to deposit to that account, either using the same prepaid Mastercard we used in the first report, or using Neosurf or Paysafe prepaid cards. These means of payment are anonymous or quasi-anonymous.

At the same time, we checked whether the Illegal Site accepted deposits by credit card, which is prohibited in Belgium.

#### 2.2.9. Possibility to play

The last point of the analysis is the verification if it was possible to play on the Illegal Site, using real money deposited in the player account.

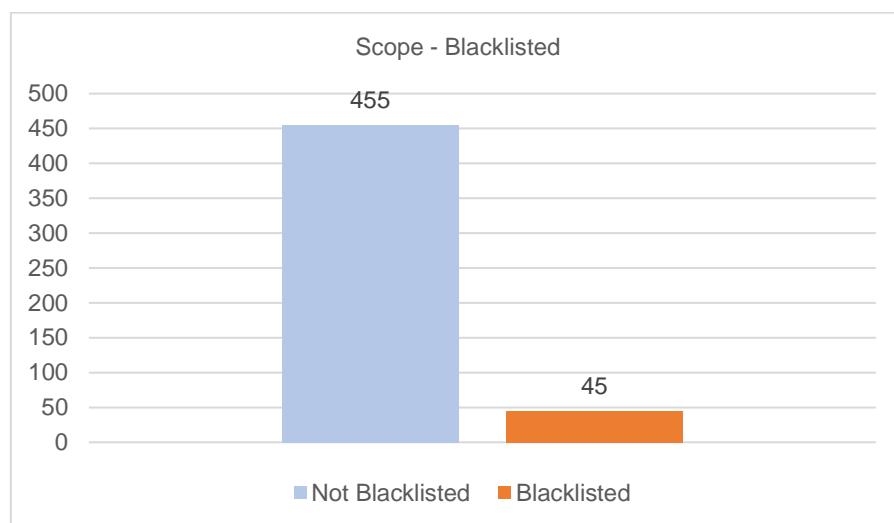

If a deposit was not possible on a Illegal Site that was already part of the analysis in May, but there was still a balance on the account, we used those funds to play.

### 3. Findings

#### 3.1. The Belgian Gaming Commission's "Blacklist"

The Prohibited Sites on the blacklist of the Gaming Commission are supposed to be inaccessible to Belgian players. Nevertheless, our analysis shows that, of the 500 illegal sites analysed, 45 are on the blacklist and are still accessible. This implies that at least 25% of the 180 Forbidden Sites (blacklisted at the time of this study) are still accessible to Belgian players. These 45 Prohibited Sites represent 9% of the 500 total Illegal Sites analysed.

It should be noted that the accessibility of the Prohibited Sites sometimes varies according to the browser used.

SCOPE STUDY		
	Websites	%
Total	500	100%
Not Blacklisted	455	91,0%
Blacklisted	45	9,0%

### 3.2. Regulators

417 Illegal Sites, i.e. 83.4% of the 500 Illegal Sites declare that they hold a licence. Of these 417 illegal sites, 330 (i.e. 66% of the 500 illegal sites) are transparent and indicate the licence number and the issuing regulator on their site.

Of the illegal sites with a licence and mentioning a regulator (330), a majority of licences are issued by two regulators: Curaçao (163 illegal sites, i.e. 32.6% of the total) and Malta (154 illegal sites, i.e. 30.8% of the total). 117 Illegal Sites, i.e. 23.4%, do not mention anything about their regulator.

Regulators	%
Alderney Gambling Control Commission	19 3,8%
Autorité Nationale des Jeux (ANJ)	6 1,2%
Curaçao e-Gaming	163 32,6%
Financial Services Regulatory Commission's Division of Gaming (Antigua)	1 0,2%
Gibraltar Gambling Commissioner	19 3,8%
Government of Anjouan	2 0,4%
Irish National Excise Licence Office	1 0,2%
Isle of Man	1 0,2%
Junta de Control de Juegos	1 0,2%
Kahnawake Gaming Commission	1 0,2%
Malta Gaming Authority	154 30,8%
Oregon Racing Commission	1 0,2%
Spelinspektionen (Sweden)	1 0,2%
Spillemyndigheden (Denmark)	1 0,2%
UK Gambling Commission	12 2,4%
Unknown	117 23,4%
<b>TOTAL</b>	<b>500 100%</b>

### 3.3. Base country

There appears to be a strong correlation between the country in which the licence is granted and the base country of the operator of the Illegal Site.

As was the case for the regulators, the operators of the illegal sites are often located in Curaçao (32.4% of the total, or 162 illegal sites) and Malta (32.2%, or 161 illegal sites). There is a significant discrepancy with the illegal sites which do not mention anywhere where they are based. During the analysis, it was noted that the illegal sites preferred to mark the country in which they are based rather than the licence under which they operate (assuming they have one).

Countries	%
Alderney	3,0%
Antigua et Barbuda	0,6%
Belize	0,4%
Canada	0,2%
Costa Rica	1,0%
Curaçao	32,4%
Cyprus	3,4%
Denmark	0,2%
Estonia	0,2%
France	1,2%
Gibraltar	3,8%
Guernesey	0,2%
Ireland	0,4%
Isle of Man	0,4%
Israel	0,2%
Malta	32,2%
New Zealand	0,2%
Panama	0,2%
South Africa	0,4%
UK	3,4%
Union of Comoros	0,4%
USA	0,4%
Unknown	15,2%
<b>TOTAL</b>	<b>100%</b>

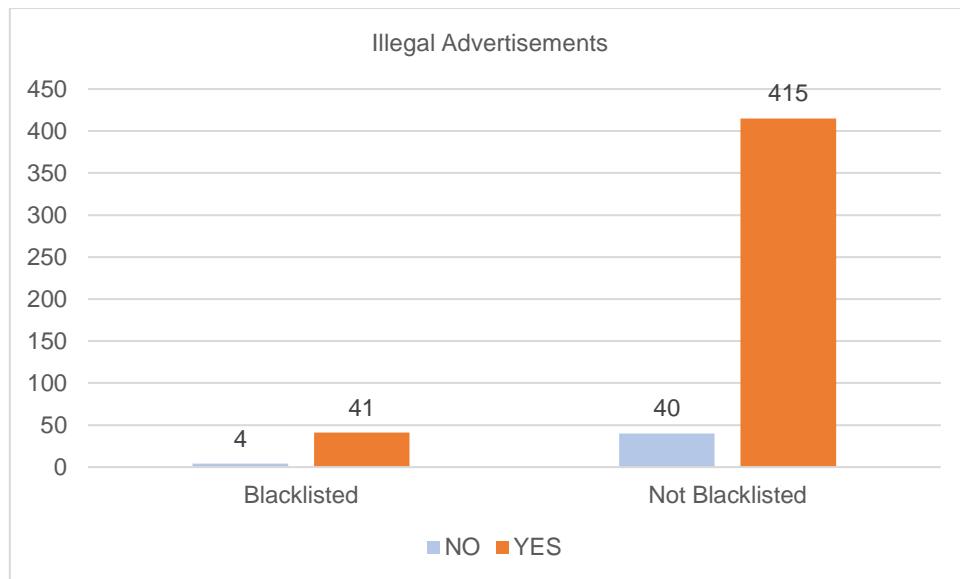

### 3.4. Advertisements

The number of Illegal Sites conducting advertising that do not meet the requirements of the Royal Decree of 25 October 2018 came to 456 (91.2%).

Of the 456 Illegal Sites that do not comply with Belgian regulations, 41 (9%) are Prohibited Sites. This represents 8% of the total number of Illegal Sites analysed (500), 22.8% of the Illegal Sites on the black list (180) and 91.1% of the Prohibited Sites analysed (45).

	ADVERTISEMENTS	
	Websites	%
YES	456	91,2%
NO	44	8,8%

	ADVERTISEMENTS	
	Websites	%
Blacklisted	41	9%
Not blacklisted	415	91%

### 3.5. Bonus offers

485 Illegal Sites (97% of the Sites surveyed) offer (prohibited) bonuses to players.

9.3% (45) of these 485 Illegal Sites are Prohibited Sites. 100% of the Prohibited Sites analysed, therefore accessible to Belgian players, offer bonuses to their players.

		BONUS	
		Blacklisted	Not Blacklisted
YES	Blacklisted	45	440
	Not Blacklisted	0	15

### 3.6. Age verification / process of identification

The identification process takes place during registration. Of the 500 illegal sites analysed, 15 had an offer focused exclusively on sports betting. The minimum age for participation in sports betting is 18 years or older. All 15 of these illegal sites, offering only sports betting, require the player to be over the age of majority.

TYPE	REQUIRED AGE PER TYPE		
	NONE	18	21
CASINO ONLY	1	325	34
SPORTS ONLY	0	15	0
MIXED	1	122	2

REQUIRED AGE		
	AGE	%
21	36	7,2%
18	462	92,4%
None	2	0,4%

The remaining 485 Illegal Sites offer casino games or a mix of casino games and sports betting. As soon as a player wishes to play casino games, they must at least be 21 years old. However, the majority of the illegal sites do not require the player to be at least 21 years of age in order to participate in casino games. Only 7.4% (or 36 illegal sites) require the player to be 21 years of age or older.

In two cases (0.4% of the Illegal Sites analysed), no age verification was carried out.

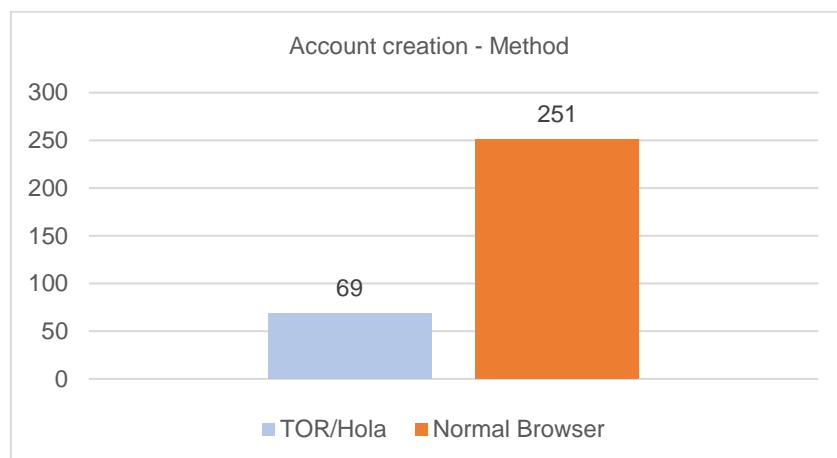

REQUIRED AGE CASINO		
	AGE	%
21	36	7,4%
18	447	92,2%
None	2	0,4%

Out of 447 illegal sites, the minimum age is only 18. This represents 89% of the 500 Illegal Sites analysed and 92.2% of the Illegal Sites offering casino products.

As a reminder, an account can often be created using false identity data; verification of age limits can easily be circumvented.

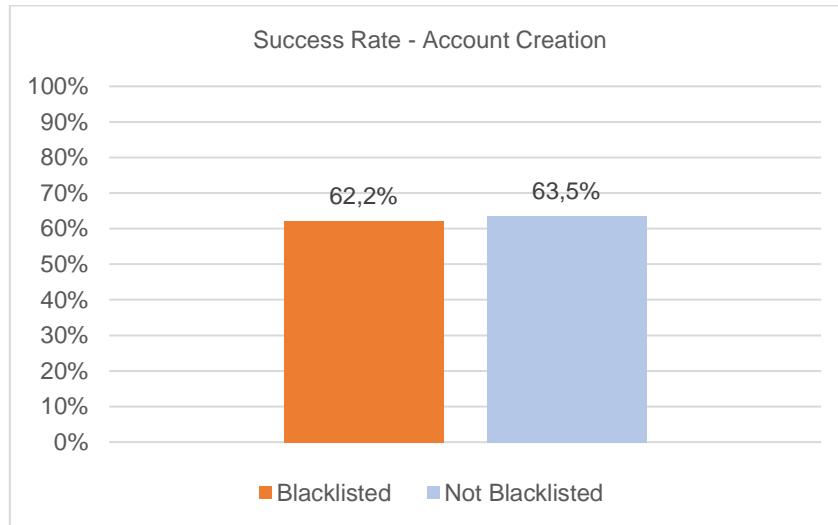

### 3.7. Possibility of opening a player account

A Belgian player can open a player account on 320 Illegal Sites (64% of the total). 78.4% of the opened accounts were opened with a normal browser. 21.6% were done with the TOR browser or the Hola plug-in.

ACCOUNT CREATION		
	Account	%
Total	320	100,0%
TOR/Hola	69	21,6%
Normal Browser	251	78,4%

On 28 of the 45 accessible Prohibited Sites, i.e. 62.2%, it is possible to create a player account. This means that on at least 15.6% of the 180 blacklisted sites, it is possible for a Belgian player to create a player account.

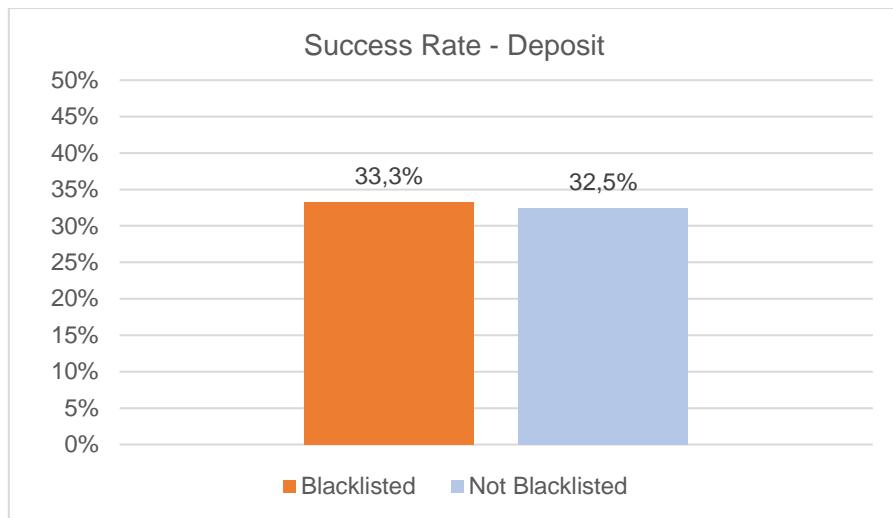

Only the Illegal Sites accessible on which we have been able to create a player account are taken into consideration in the following analyses.

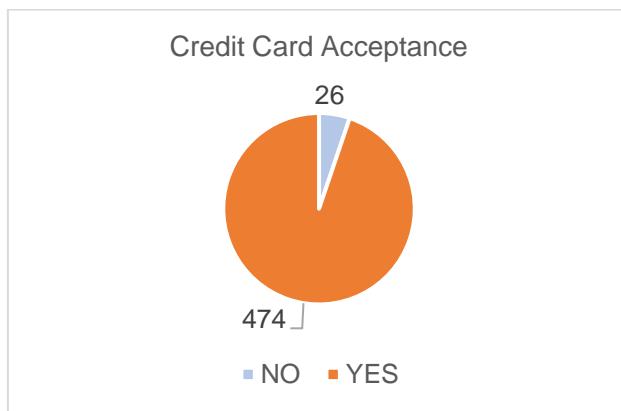

### 3.8. Possibility of depositing – Credit cards accepted

On 32.6% (163) of the 500 Sites, we managed to deposit real money. This equates to a success rate of 50.9% of the illegal sites on which we managed to create an account. Of the 163 successful Deposits to the 163 Illegal Sites, 15 are Prohibited Sites. This equates to a success rate of 33.3% for Prohibited Sites and 32.5% for Illegal Sites.

SUCCESSFUL DEPOSIT		
	Deposit	%
Total	320	100%
No Deposit	157	49,1%
Deposit	163	50,9%

Credit cards are accepted on 474 Illegal Sites, or 94.8%. They are also accepted on all 45 of the 45 Prohibited Sites analysed (100%).

It should be noted that for this analysis we did not use the full range of payment methods available to the Belgian player. In reality, the number of Illegal Sites on which it is possible to deposit is undoubtedly higher.

The same applies to the fact that we exclusively used a false identity. Some Illegal Sites advertise that they accept Belgian players but require identity verification before a deposit is possible. This is a limiting factor in the analysis since we were not able to verify our (false) identity. In reality, a real Belgian player could provide documents in order to verify his identity and could therefore deposit. The number of Illegal Sites on which it is possible to deposit in practice is therefore higher.

### 3.9. Possibility to play

It should be noted that it was possible to play on more sites than on those on which it was only possible to deposit (165 vs.163).

In 9 instances, a deposit was not possible but a balance was still available on our player account (created during the previous version of the study) or free games were offered to us upon registration. In 7 instances, a deposit was possible but we did not manage to play.

SUCCESSFUL PLAY	
Play but no deposit	9
Play after deposit	156
Deposit but no play	7

This implies that out of 165 (or 33%) of the 500 Illegal Sites analysed we were able to play.

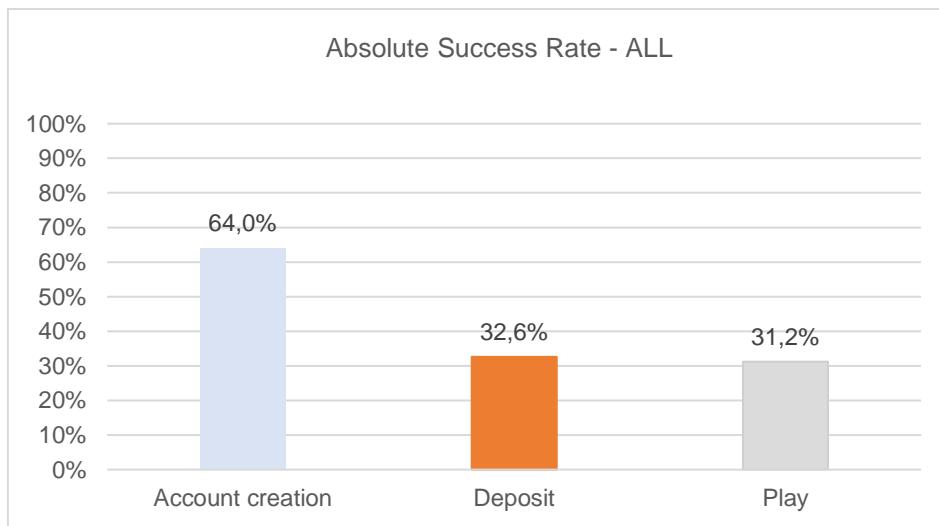

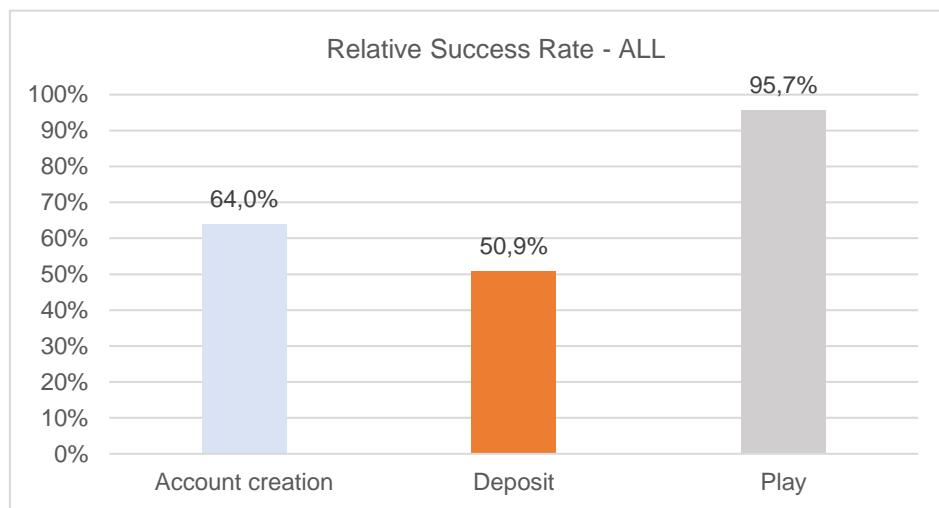

If we disregard the 9 instances mentioned above (where it was possible to play but not to deposit) for the sake of simplicity, we achieve a success rate of 96% (156) for a game on the Illegal Sites on which it was possible to deposit. Of these 156 Illegal Sites, 13 were on the Gaming Commission's black list. This corresponds to 7% of the Prohibited Sites on the Gaming Commission's black list.

SUCCESSFUL PLAY AFTER DEPOSIT		
	Play	%
Total	156	100%
Not Blacklisted	143	92%
Blacklisted	13	8%

### 3.10. In summary

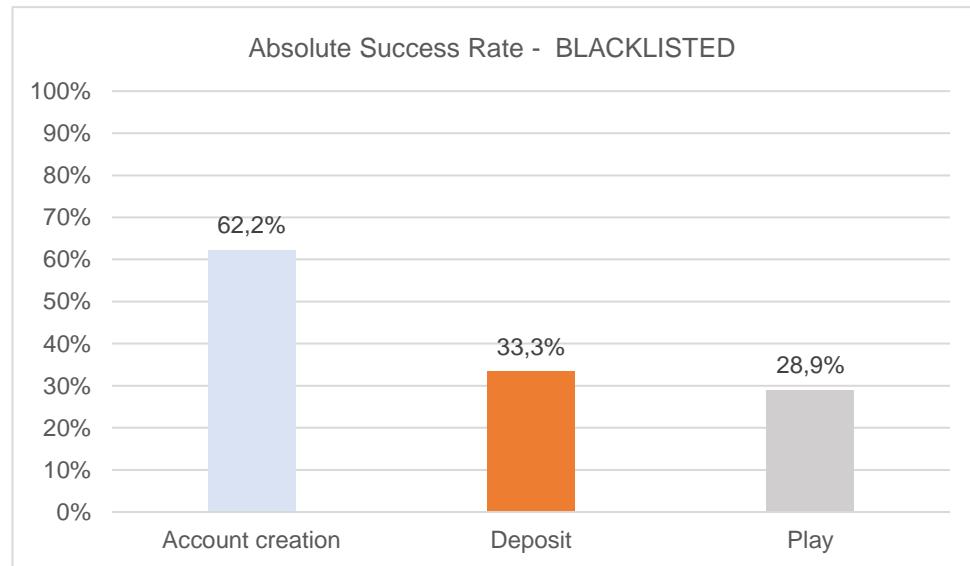

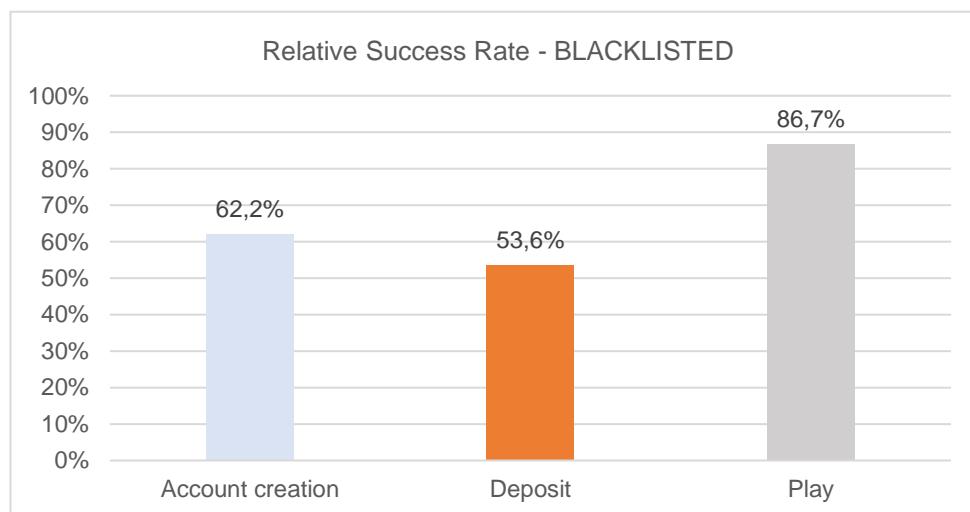

#### 3.10.1. ALL ILLEGAL SITES

- We were able to create an account on 64% of the 500 Illegal Sites included in this analysis. ;
- On 50.9% of the accounts created, we were able to deposit money ;
- On 95.7% of the accounts on which we were able to deposit, or 31.2% of the total of the 500 Illegal Sites analysed, we were also able to play.

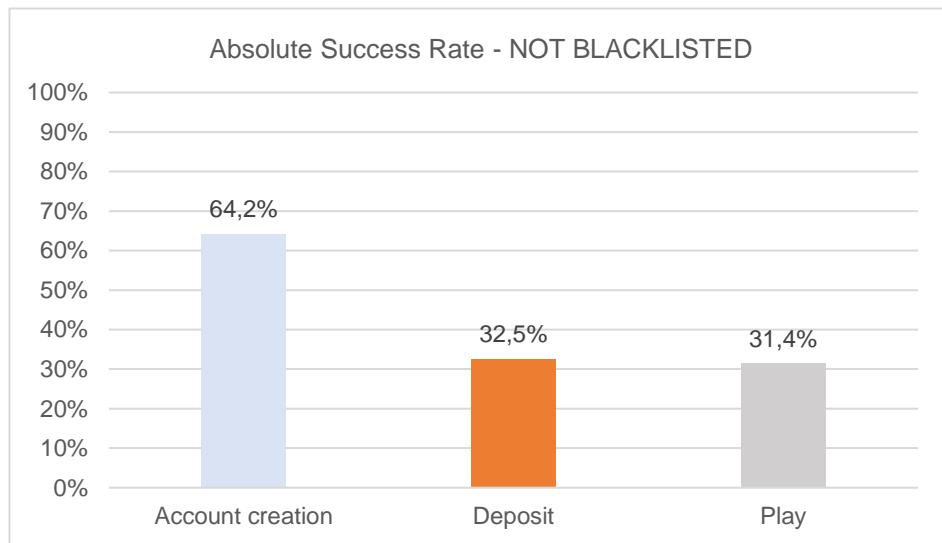

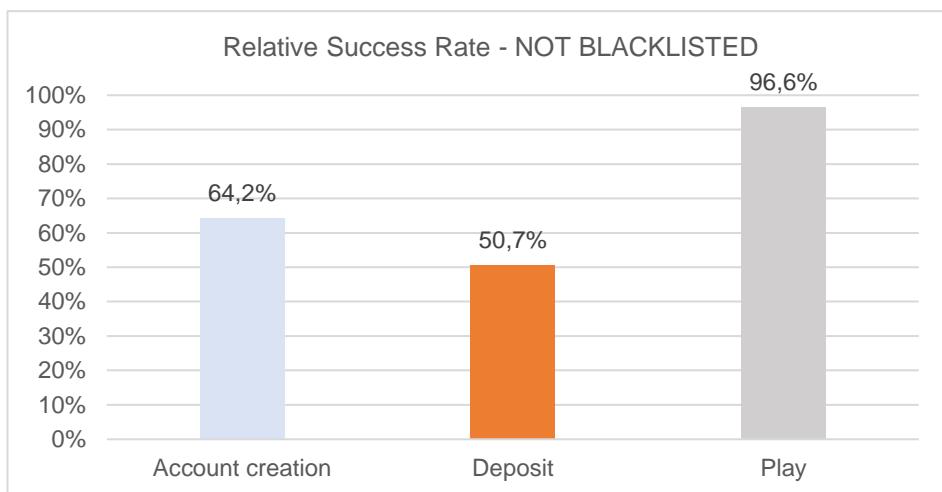

### 3.10.2. PROHIBITED SITES

- We were able to create an account on 62.2% of the 45 Prohibited Sites included in this analysis ;
- On 53.6% of the accounts created, we were able to deposit money ;
- On 86.7% of the accounts on which we were able to deposit, or 28.9% of the 45 Prohibited Sites analysed, we were also able to play.

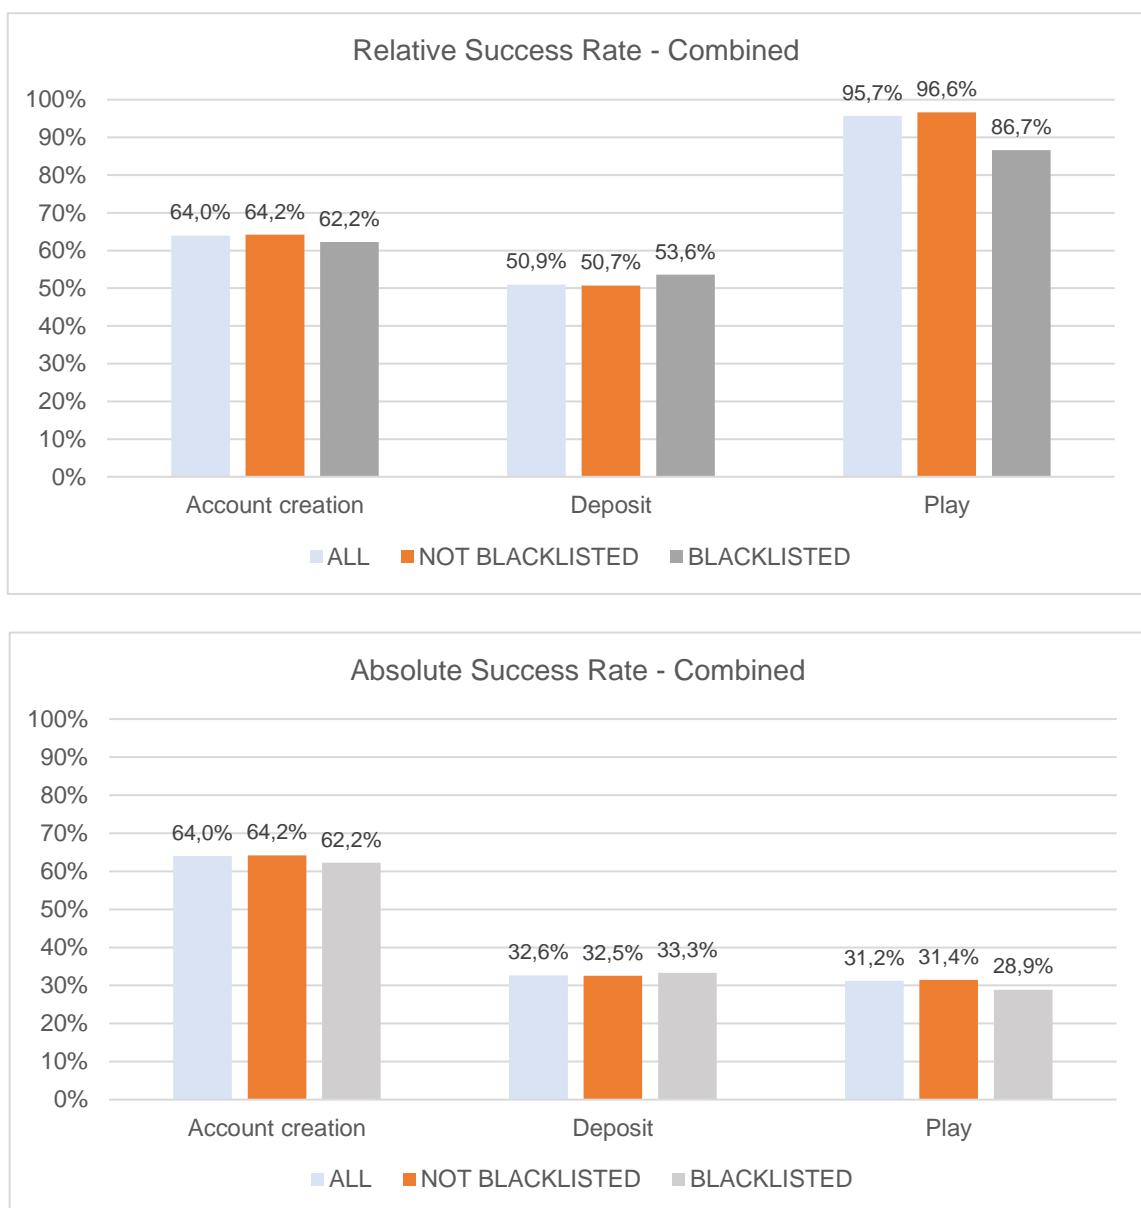

### 3.10.3. ILLEGAL NON PROHIBITED SITES

- We were able to create an account on 64.2% of the 455 Illegal Sites (non-Prohibited Sites) included in this analysis. ;
- On 50.7% of the accounts created, we were able to deposit money ;
- We were also able to play on 96.6% of the accounts on which we were able to deposit, or 31.4% of the total of 455 Illegal (non-Prohibited) Sites analysed.

### 3.10.4. COMPARISON

## 4. Fiscal Impact

From a fiscal point of view, the activities of illegal gambling authorities represent a huge loss of revenue for the state. Their revenue is not subject to federal, local or regional taxes.

Indeed, these operators, who are not established in Belgium, do not pay corporation tax since they established in Belgium. However, in principle gambling legislation requires them to have a physical establishment in Belgium (which is therefore taxable there) in order to carry out an online activity. This is a significant loss for the Federal State, representing up to 25% of the net annual profit of these companies.

These operators also do not pay the regional tax on gambling and betting since they do not have a server in Belgium. Gambling law requires a server be located in our country in order to carry out an online gaming activity. The Regions use the location of this server as a basis for defining their tax jurisdiction. An operator who infringes the law on games of chance therefore de facto places itself outside the tax jurisdiction of the Regions, generating a deadweight loss of 11% of the real gross margin generated by these operators on Belgian players.

Finally, in a more indirect way, as the illegal operators are established abroad, they do not consume goods and services generating Belgian VAT. However, this VAT represents a direct, non-recoverable charge for operators holding a valid licence - an additional tax that illegal operators are therefore not subject to.

## 5. Illegal Practices

In addition to proposing an offering bursting with bonuses and other advantages for players, much more attractive than the offer of the legal operators, the operators of Illegal sites do not hesitate to use deceptive and illegal practices in order to attract Belgian players.

Since the beginning of 2020, Ladbrokes.be has been faced with three cases in which operators of illegal sites have tried to divert players to their own site using a mobile application, which resembles that of the legal operator, and which redirects players to their own website.

The screenshot shows the Google Play Store search results for "ladbrokes". The search bar at the top shows "ladbrokes". Below it, there are two main sections: "SportBet. Team" and a list of search results.

This application uses the Ladbrokes logo and is available in the Google Play Store. In the description, it is noted that this is an application that solves problems and bugs on the official Ladbrokes.be application.

When a player downloads the application and tries to open it, he is sent back to the site of the illegal operator.

Ladbrokes.be is certainly not the only operator confronted with shameful and illegal practices by unauthorised operators in Belgium. The fact that illegal operators go so far in their tactics and shamelessly "pirate" the brands of legal and well-known operators on the Belgian market says it all. The people behind such practices are by no means legal operators and the safety and protection of the player is at risk.

## 6. Conclusion

The objective and the logic structuring the Belgian gambling legislation is to channel the players towards a regulated and protective legal offer.

For this reason, the legal operators, licensed by the Gaming Commission and subject to the local regulatory framework, hold the monopoly of the Belgian online gambling offer.

This study, in its extended version of a total of 500 sites, shows that:

- the legal Belgian operators monopoly is purely theoretical because the illegal offering is overwhelming ;
- in reality, legal operators face fierce competition from illegal operators, against whom they compete at a disadvantage due to the latter not caring about player protection rules (aggressive advertising, no bans on bonuses, no deposit limits, less strict age criteria, etc.) ;
- it is still very easy to access non-licensed gambling sites in Belgium and does not require any particular IT competency or skill ;
- some operators have no scruples and seize any and all opportunities to divert players to their site, using many illegal practices (brand piracy,...).

It is therefore crucial, if the channelling is not to remain a pipe dream and in the interests of player protection<sup>12</sup>, that the public authorities take the necessary measures to support the struggle of legal operators.

The Belgian State must act on two levels. On the one hand, it must deploy effective means to prohibit Illegal Sites and establish working contacts with Malta and Curaçao to prevent illegal operators from being active in Belgium. Collaboration with financial institutions can also be envisaged. On the other hand, it must make Belgian regulations more flexible to allow the survival of legal operators (whether in tax matters or in gaming law to allow legal operators to offer a competitive product) and prioritise players' personal responsibility rather than rely on the logic of prohibition.

---

<sup>12</sup> Gamblers who are excluded via a national exclusion system will often play on foreign sites in order to circumvent their ban, as this Swedish study shows: " *Also, policy makers should use gambling regulation in order to decrease the risk of breaching self-exclusion online, such as through the prohibition of non-registered gambling operators* "; Gambling Despite Nationwide Self-Exclusion-A Survey in Online Gamblers in Sweden, Anders Håkansson and Carolina Widinghoff, <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7738608/>.

## SCREENSHOTS SEPTEMBER 2020

A screenshot of the 777.com Promotions page. The left sidebar shows a user profile with a bowler hat icon, 'LOG IN', 'Notifications', 'FreePlay', and a menu with 'Home', 'Slots', 'Roulette', 'Blackjack', 'Live Casino', 'Jackpots', 'Promotions' (which is highlighted), and 'VIP'. The main content area has a yellow header with 'Promotions' and a search bar. Below it, under 'New Players', there are two sections: 'WELCOME BONUS' featuring a woman with a jar of money and cherries, and 'REGISTRATION OFFER' featuring a woman with slot machine symbols. Both sections have 'READ MORE' and 'DEPOSIT NOW' buttons.
